

# Shared Mobility Principles for Livable Cities

The future of mobility in cities is multimodal and integrated. When vehicles are used, they will be right-sized, shared\*, and zero emission. These principles guide urban decision-makers and stakeholders toward the best outcomes for all.

1  
**Plan cities and mobility together**

2  
**Focus on moving people, not cars**

3  
**Encourage efficient use of space and assets**

4  
**Engage stakeholders in decision making**

5  
**Design for equitable access**

6  
**Transition towards zero emissions**

7  
**Seek fair user fees**

8  
**Deliver public benefits via open data**

10  
**Automated vehicles must be shared**

9  
**Promote integration and seamless connectivity**

\*Shared vehicles include all those used for hire to transport people (mass transit, private shuttles, buses, taxis, auto-rickshaws, car and bike-sharing) and urban delivery vehicles.
